CARRIER PROFILE MANAGEMENT

A Unique, Powerful Safety Management Solution

A web-based safety management tool that helps motor carriers improve their roadside inspection results and corresponding CSA 2010 scores - by reducing their number of violations. CPM also helps them be better prepared for Department of Transportation (DOT) compliance reviews by reconciling and verifying the records that would likely be selected during an audit.

SAFETY MANAGEMENT REPORTS

CPM also includes a myriad of reporting tools that the carrier can use to identify root causes of violations and take steps to prevent future problems.

Roadside Violation Summary

A useful summary of violations stemming from recent roadside inspections. The report shows you which violations were most common and the operational regions in which they occurred most often.
