

TSG

TRANSFORCE SERVICES GROUP

The Compliance Services Division of TransForce, Inc.

A Nationwide Professional Services Firm That Helps Companies Understand and Comply with the Federal Motor Carrier Safety Regulations

ABOUT US

We are the compliance services division of TransForce, Inc., a nationwide provider of workforce solutions to the transportation industry. We provide consulting and compliance services to some of the nation's largest motor carriers. Our team of safety consultants is comprised of individuals who have worked for major motor carriers, the Department of Transportation (DOT) and the American Trucking Associations (ATA). We are members and active participants in the ATA Regulations Committee, the ATA Safety Policy Committee, the Commercial Vehicle Safety Alliance and the National Private Truck Council.

WHY US?... Because the stakes are high

Federal safety investigators are more actively and aggressively enforcing the regulations. As a result, fine assessments are higher than ever. Also, carriers who fail DOT audits face mandatory "shut-down" orders. Finally, the derogatory safety data resulting from these audits and other company safety data – accidents, citations – are publicly available on-line to insurance carriers, shippers and plaintiffs' attorneys.

OUR SERVICES:

Guidance

Consulting and training on the pertinent regulatory requirements

Audits/Compliance Assessments

Simulated DOT Compliance Reviews

Customized Solutions

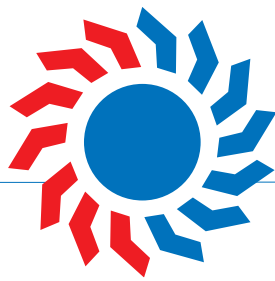

Forms and processes to help companies easily comply with the regulations

Outsourcing Options

Turnkey solutions for an efficient compliance program

TSG

TRANSFORCE SERVICES GROUP

The Compliance Services Division of TransForce, Inc.

GUIDANCE:

Consulting and Training Services

We provide executive-level consulting on how companies can best manage the risks associated with non-compliance. These risks – insurance costs, accidents, public safety records – can pose a substantial threat to your business, if not properly managed. We also provide customized training programs to help companies educate their drivers and managers alike.

AUDITS/COMPLIANCE ASSESSMENTS:

Just like a DOT audit.....but without the consequences!

A comprehensive top-to-bottom review of your operation to measure your compliance with the Federal Motor Carrier Safety Regulations. Our safety advisors audit records and review procedures to spot deficiencies and identify appropriate corrective measures. These assessments are made using the very software and procedures that DOT investigators use when conducting genuine compliance reviews.

What We Review:

We examine every area of your operation for compliance with the Federal Motor Carrier Safety Regulations including:

- Driver Qualification
- Drug and Alcohol Testing
- Hours of Service
- Vehicle Maintenance
- Accident Records

What We'll Tell You:

As a result of the review we'll tell you ...

- The Violations – That DOT would likely discover
- The Fines – That DOT would assess your company
- The Safety Rating – That DOT would assign your company
- The Corrective Actions – That would be needed to bring your company into compliance.

CUSTOMIZED SOLUTIONS:

Forms and processes to help companies easily comply with the regulations

We make it easy by providing the forms and checklists you need in a single package. We also help develop the processes you need to complete and retain the paperwork as required.

OUTSOURCING OPTIONS:

So you can focus on your core business

Many companies choose to outsource the most burdensome components of their compliance program so that they can focus on their core business. TSG and its business partners have the systems and expertise to manage these components in a cost-efficient manner. In particular, we provide:

- Drug and Alcohol Testing – A complete program to ensure compliance with the drug and alcohol testing regulations including random selection, lab analysis and MRO reporting of test results.
- Driver Background Screening Services – Inquiries to each applicant's previous employers and states of licensure (motor vehicle records).
- Driver Qualification File Maintenance – An inventory/audit of driver qualification files and alerts to documents due to expire (licenses, medical examiners certificates).
