### Driver Staffing Agency Beats Industry on Safety Results

SPRINGFIELD, Va. – February 1, 2013 -- TransForce Inc. is the nation’s leading provider of driver staffing solutions to America’s motor carriers. TransForce is pleased to report its five-year DOT reportable accident rate of only 0.30 accidents per million miles driven. TransForce’s accident rates are well below comparable industry measures and reflect the Company’s culture of quality, compliance and safety.

DOT reportable accidents are those that involve any of the following: 1) a fatality, 2) an injury that requires immediate treatment away from the scene of the accident, or 3) disabling damage to a vehicle, requiring it to be towed. Accidents are reportable to the DOT regardless of fault.

The National Private Truck Council reports an average accident rate for private carriers of 0.48 crashes per million miles traveled (source: NPTC 2012 annual benchmarking survey). This rate for private fleets is 50% higher than TransForce’s accident rate.

The Federal Motor Carrier Safety Administration (FMCSA) does not report an average accident rate for all motor carriers, but FMCSA does track average reportable accident rates for carriers that undergo compliance audits. The chart below shows an average accident rate for audited carriers for 2008 to 2010 of 0.725 crashes per million miles, two and a half times higher than TransForce’s rate.

TransForce fosters a culture of safety with drivers from the initial contact through each and every project to which they are assigned. All TransForce drivers are subject to a screening process that ensures they exceed the Department of Transportation (DOT) standards. TransForce publishes an in-house safety newsletter - *In the Safety Zone* - that serves to promote safe driving practices.

**DOT Recordable Crash Rates – Reported Annually by FMCSA**  
*Collected & Retained by the American Trucking Associations, Inc.*

YEAR	FMCSA-REPORTED DOT RECORDABLE CRASH RATE*
1998	.857 recordable crashes per million miles
1999	.886 “
2000	.842 “
2001	.805 “
2002	.708 “
2003	.744 “
2004	.780 “
2005	.744 “
2006	.826 “
2007	.833 “
2008	.771 “
2009	.714 “
2010	.689 “

\* DOT recordable crash rate based on recordable crashes and mileage collected by FMCSA and state agency personnel during federal and state compliance reviews performed on motor carriers.
